

JMXR Virtual and Augmented Reality Boot Camp

Interested in getting started with Virtual and Augmented Reality (XR) but not sure where to begin? JMXR VR/ AR Boot Camp provides you with the insight you need to make strong, informed decisions about how to leverage immersive technology in your company. In addition, JMXR Boot Camp also gives participants the practical skills needed to design, create, and implement both VR and AR experiences as part of their modern training curriculum.

This 2 day session offers a hands-on, interactive approach to build the skills you need to apply immersive reality training in your learning and development program. Together, we will leverage enterprise-ready tools to create both VR and AR content.

Boot Camp Highlights

- Comprehensive getting started guide to XR
- How to design for 3 dimensions
- Brainstorming techniques for Immersive Reality
- Where to use VR and AR in your training programs
- Practice pitching training ideas for XR
- Create your own VR and AR experiences, without any code

By the end of the boot camp, you will be able to:

- Generate ideas for both Virtual and Augmented Reality training modules
- Pitch ideas to stakeholders persuasively
- Understand the benefits and differences of major XR hardware platforms
- Design instructional plans that leverage XR technology
- Create Augmented Reality training modules without any code
- Create Virtual Reality training modules without any code
- Identify key performance indicators of XR training programs
- Measure the success of your XR training programs
